

Sanitation Assessments and Services

BevTrac Mobile Quality Systems is the first company in the wine industry to offer on-site sanitation solutions. With access to our mobile laboratory, we have the ability to provide both rapid assessments of the sanitary condition of your facility as well as a thorough review of your practices and methods thus enabling our clients to improve overall wine quality.

- Initial assessment of chemicals and cleaning methods used to include recommendations for improvement based on the individual needs of the winery.
- Microbiological swabbing of winery equipment and infrastructure to provide information regarding what is currently present at the facility as well as what actions should be taken to minimize risk to the wine.
- Development and implementation of a facility sanitation program to include frequency of cleaning for product contact equipment as well as winery infrastructure.
- Maintenance of the sanitation program to include periodic swabbing and visual assessments.
- Sanitation training and bilingual education for cellar personnel.
