

ETS EXPANDS HARVEST COURIER SERVICE

SONOMA & MENDOCINO COUNTIES DAILY

ETS Laboratories has expanded its popular complimentary courier service in Sonoma County and Mendocino County during the 2009 harvest. ETS no cost harvest courier service coupled with our new laboratory location in Healdsburg provides wineries and vineyards in Mendocino and Sonoma Counties with even greater standards of convenience and service, continuing the close relationship and commitment ETS has always had with these wine growing regions. Expanded courier service is available daily in Sonoma and Mendocino Counties.

Send ETS your samples for analysis, quickly and easily, using complimentary ETS Express courier service. Samples will be delivered to the laboratory the same day. No special packaging is required.

ETS offers a full range of analytical services, including manual and automated chemistry using sequential auto-analyzers and other advanced techniques in addition to frequent courier service. The Healdsburg laboratory is staffed by two of ETS' most senior employees, who have been with the company since the early 1980's serving the wine industry's analytical needs. ETS Technical experts will be available at the Healdsburg location regularly to discuss technical questions and to provide seamless integration with the ETS St. Helena facility.
